Summary

Logical and results-driven Web Developer dedicated to building and optimizing user-focused websites for customers with various business objectives. Judicious and creative when crafting effective websites, apps, and platforms to propel competitive advantage and revenue growth. Technically proficient and analytical problem solver with a calm and focused demeanor.

Work Experience

Internship, KeepSolid (Part-Time), Odesa

June 2020 - August 2020

Developed landing pages, dashboards and online applications using Vue.js. Conceived and built optimized landing pages in HTML and CSS, including Vue.js integration and cross-browser compatibility, to support marketing. Reviewed code to validate structures, assess security and verify browser, device and operating system.

Front-end developer, Freelance

December 2019 - Present

- Developed and maintained the user interface for a web application using React.
- Integrated with the back-end through REST APIs, ensuring data exchange between front-end and back-end.
- Optimized the site's performance, improving loading times and overall speed.
- Collaborated with designers to implement UI/UX designs and ensure their practical realization.
- Participated in daily stand-ups, code reviews, and architectural discussions.

Education

Master's degree , Odesa National Polytechnic University (ONPU) (Computer engineering)

September 2014 - December 2019

Study various disciplines related to hardware and software development, computer architecture, networks, control systems, and other critical aspects of modern computer systems.
